

WEB PROGRAMMING AND APPLICATIONS (503073)

WEEK 7

Prepared by Mai Van Manh

Exercise 1: Use PHP to print out a table like this.

1	Sinh viên 1
2	Sinh viên 2
3	Sinh viên 3
4	Sinh viên 4
5	Sinh viên 5
6	Sinh viên 6
7	Sinh viên 7
8	Sinh viên 8
9	Sinh viên 9
10	Sinh viên 10

Normal

1	Sinh viên 1
2	Sinh viên 2
3	Sinh viên 3
4	Sinh viên 4
5	Sinh viên 5
6	Sinh viên 6
7	Sinh viên 7
8	Sinh viên 8
9	Sinh viên 9
10	Sinh viên 10

When mouse over the 2nd row

- All rows have a background color.
- There are 3 different colors and the colors repeat to the end of the table in order.
- The color of each row will change when mouse over it (choose any color you like).

Exercise 2: Create a site that allows to manage the folders and files on the server. The site has the same interface as Google Drive: showing files and folders in list view (with icons).

There are buttons that perform functions such as: create folders, delete files and folders, rename the selected files and folders ...

When clicked on a directory, the site will display the files and folders inside that folder.
