

WEB PROGRAMMING AND APPLICATIONS (503073)

WEEK 4

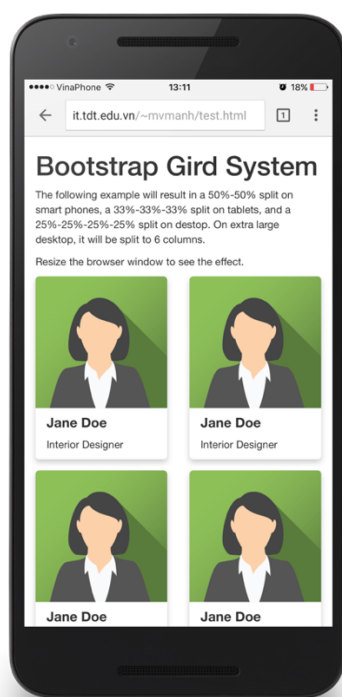

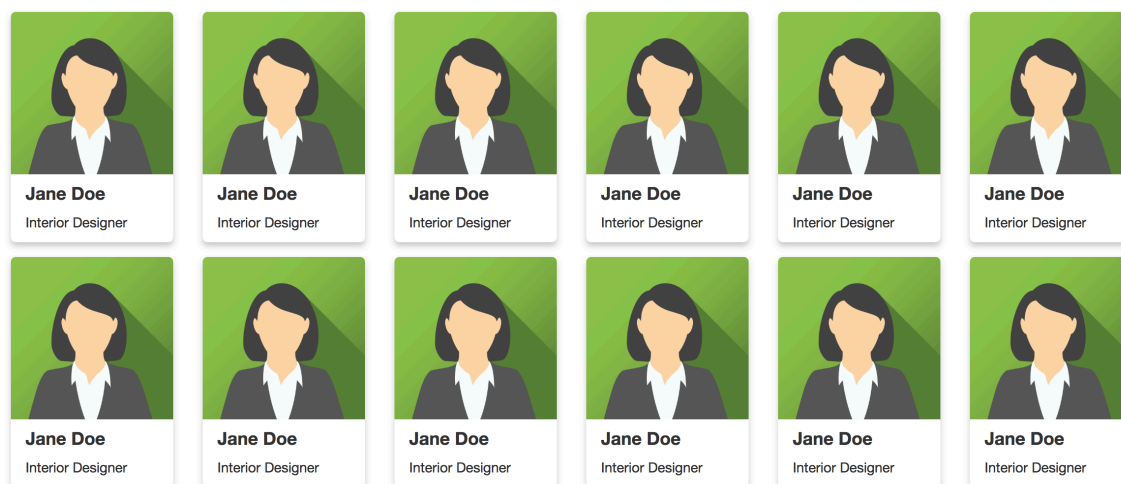

Prepared by Mai Van Manh

Exercise 1: Use Bootstrap grid system to design the following responsive web page:

Bootstrap Grid System

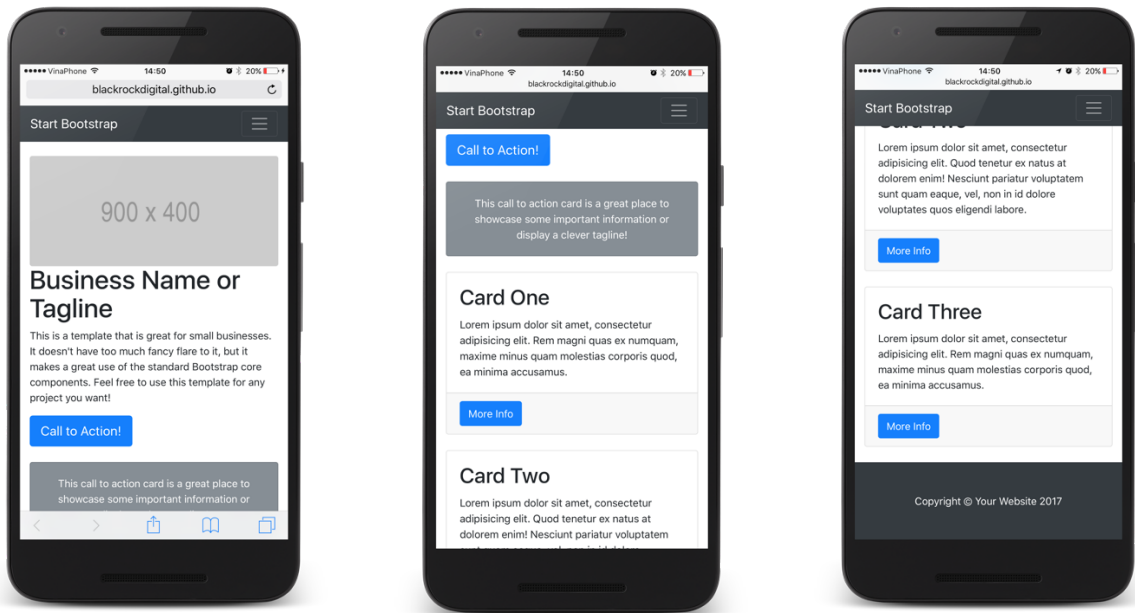

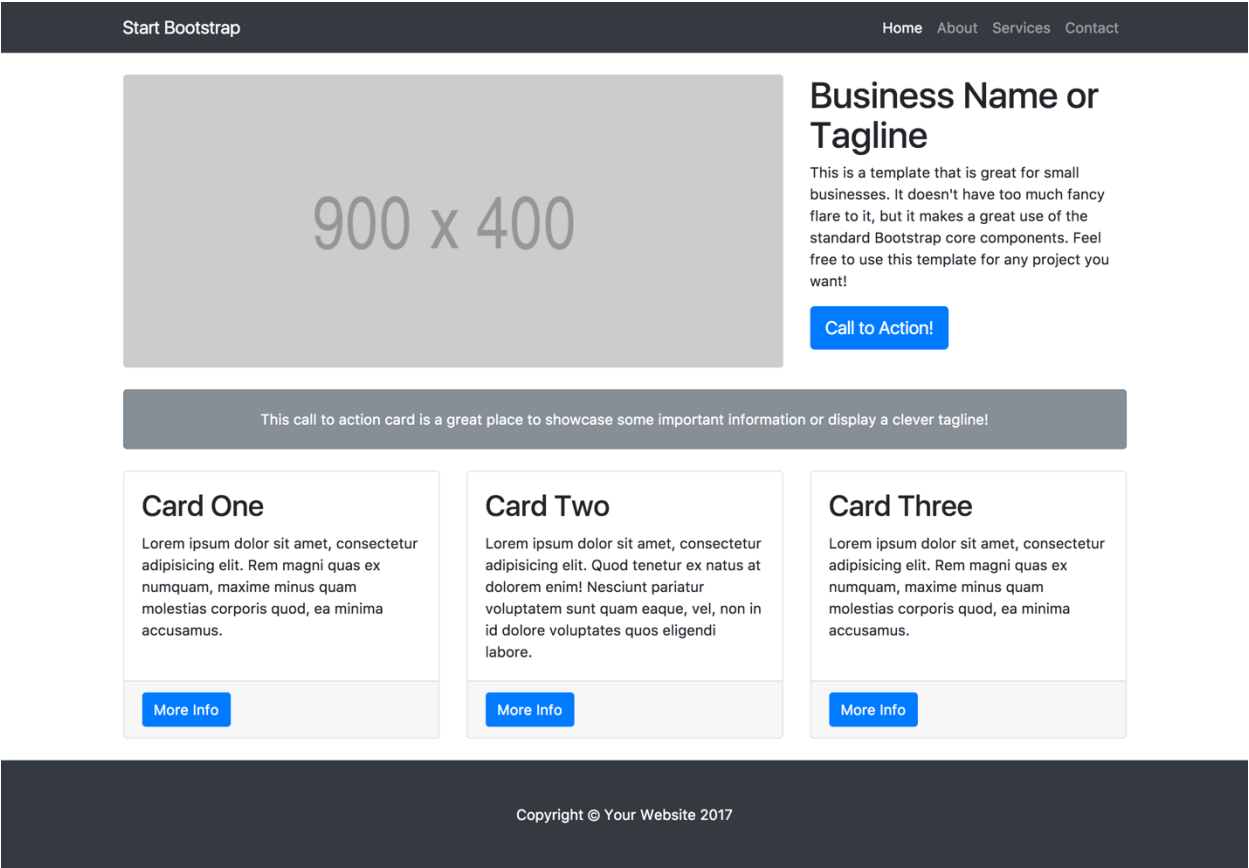

The following example will result in a 50%-50% split on smart phones, a 33%-33%-33% split on tablets, and a 25%-25%-25%-25% split on desktop. On extra large desktop, it will be split to 6 columns.

Resize the browser window to see the effect.

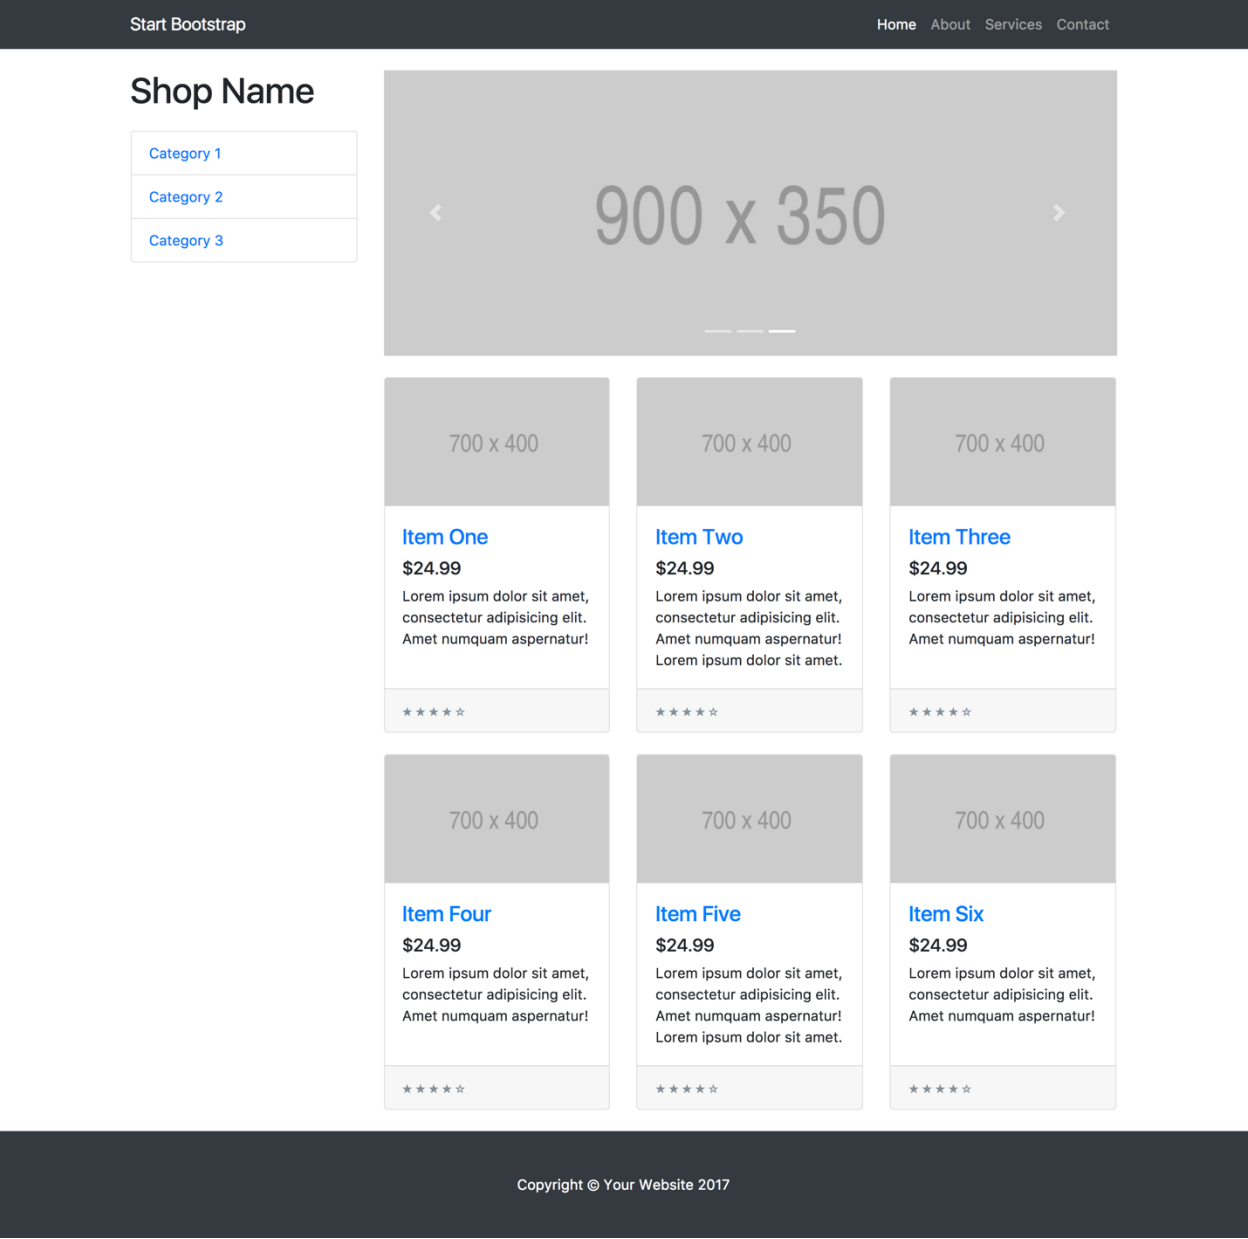

See example video (*exercise1-demo.mp4*) for better explanation.

Exercise 2: Create a responsive website look like the following screenshots:

See example video (*exercise2-demo.mp4*) for better explanation.

Exercise 3: Create a responsive website look like the following screenshots:

See example video (*exercise3-demo.mp4*) for better explanation.
